DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Claims 3-5, 7, 8, 13, 14 and 16 are objected to for the following reasons:

In claim 3, the recitation of "wherein the torque of each motor is detected and used for determining the plate position" is unclear as to in what way the torque of the motor is detected and used. Perhaps the phrase --magnitude of the-- should be added before the word "torque" in order to be clear it is the magnitude of the torque that is detected and used to determine the position of the servo shaft and thus the plate position.

In claim 5, the phrase "for controlling the servo shafts" is suggested to be changed to --for controlling the positions of the servo shafts-- so as improve its clarity.

In claim 13, the phrase --magnitude of the-- is suggested to be added before the word "torque" for the same reason as discussed regarding claim 3 above.

Claims 1, 2, 6, 9-12 and 15 distinguish over the prior of record and thus are allowed.

Claims 3-5, 7, 8, 13, 14 and 16, if revised to overcome the above objections to the satisfaction of the Examiner, would also be allowed.

The following is an Examiner's statement indicating allowable subject matter:

Regarding claim 1, the overall structural requirement of a centering system for a screen printing apparatus as claimed including particularly the use of adjustable servo shafts for moving the abutment wheels and the beams and a stationary frame on which the adjustable servo shafts are mounted is not taught nor suggested by the prior art of record.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
